

# UNLOADING POUCH

The UNLOADING POUCH from Pacific Safety Products is a portable unloading station designed for use in areas where an accidental discharge could have serious consequences. In addition to safely defeating an accidentally discharged round, the UNLOADING POUCH safely catches the round ejected during unloading. Measuring 9 1/2" X 4 1/2" X 2 1/2" the UNLOADING POUCH is a discrete case that defeats NIJ level II. Insert the barrel of the weapon into the fleece lined barrel sleeve. Secure the gun in place with the retaining strap and unload the weapon. The strap holding the weapon to the UNLOADING POUCH allows simple two handed use with one hand to hold the gun while the other hand is free to remove the magazine and empty the chamber.

## UNLOADING POUCH (Model# 6370)
