

ProFit™ Sizing Program

NEW to the Protected by PSP™ family; the ProFit™ Sizing Program.

Optimum fit means optimum vest performance. If your vest doesn't fit right, chances are that it won't be comfortable, either. Comfort and proper fit are essential for proper ballistic protection.

That's why PSP developed the ProFit™ Sizing Program. A number of key aspects make the PSP ProFit™ Sizing Program an industry leader:

- PSP has revised its armor sizing system to provide a cleaner and closer fit.
- We've revised our sizing forms – user friendly and easy to follow
- We've developed mathematical algorithms which will identify incorrect measurements and recommend correct ones prior to manufacturing.
- We've updated our website to allow on-line submission of measurements.

What does this mean for you?

- The revised sizing system and updated armor shape allow greater comfort, mobility, flexibility and concealment.
- A better fitting vest provides more reliable ballistic protection.
- Our system will identify incorrect measurements and recommend new ones, reducing the chance you'll get a vest that doesn't fit or one that has to be altered.
- Our easy-to-use sizing sheets and on-line database make measurement submission easy and reduces delivery time.
- Departmental historical data files can be accessed by using an assigned password to review personnel sizing information.
- Historical files can be used for re-order of concealable armor or for new orders of tactical armor.
- Custom vest dimensions can be specified for personal fit preferences.

ProFit™ ensures an accurate fit the first time and dramatically eliminates returns for alteration. Go on-line at www.pacsafety.com to view ProFit™, or call your local Distributor.
