

Pacific Safety Product's (PSP) mission ... *we bring everyday heroes home safely.* ® is inherent in the lifesaving protective products it delivers.

Since the beginning of the pandemic in early 2020 we have been supporting those law enforcement, fire and EMS agencies that are out on the front lines, selflessly exposing themselves to the deadly respiratory disease COVID-19 (coronavirus).

In order to prevent exposure and illness it is critical for First Responders to frequently and thoroughly disinfect all armour equipment.

Below are important guidelines to properly disinfect PSP / Safariland Armour products including ballistics, carriers, hard armour plates, shields and helmets.

- Visibly dirty surfaces should be cleaned using a mild detergent or soap and water prior to disinfection.
- Refer to PSP's [Use and Care](#) for cleaning information on armour ballistic and carriers. This information is located on the product care label, the product hang tag or can be requested from your PSP Customer Care Representative by contacting CustomerCare.PSP@safariland.com
- **DO NOT USE AEROSOLS** such as Lysol, on PSP/Safariland armour products. Aerosols may negatively affect the ballistic material reducing the performance of the product.
- Do not use disinfectant wipes that contain bleach
- Refer to the product label for the required contact time (how long the disinfectant should remain on the surface), the product shelf-life and all safety instructions prior to handling and use
- The surface should remain 'visibly wet' for the prescribed contact time in order to produce disinfection. NOTE: If the surface is not kept wet for the appropriate amount of time to kill the microorganisms it is possible to spread the microorganisms with the wipe
- It may be necessary to use more than one (1) wipe to keep the surface wet for the recommended contact time
- After the prescribed disinfectant contact time, the surface may be wiped dry or the surface may be allowed to air dry

Should you have any additional questions or concerns regarding the proper disinfecting of PSP/Safariland armour products please contact CustomerCare.PSP@safariland.com

As always we are extremely grateful for your service and we offer our continued support through this trying time.
