

Pacific Safety Product's (PSP) mission ... *we bring everyday heroes home safely.* ® is inherent in the lifesaving protective products it delivers.

Below are important guidelines to properly clean armour products including ballistics, carriers, hard armour plates, shields and helmets.

#### **Carriers**

- **Remove ballistics and empty pockets prior to washing.**
- Wash in accordance with carrier label. Do not dry clean.
- Hang to dry.

#### **Ballistic panels**

- Visibly dirty surfaces are cleaned using a mild detergent or soap and water.
- Do not dry clean or machine wash.
- Do not bleach.
- Do not iron.

#### **Hard Armour/Helmets/Shields**

- Wash with mild soap and water using a cloth on outer surface.

#### **Disinfecting**

- **Do not use aerosols** such as Lysol, on PSP/Safariland armour products. Aerosols may negatively affect the ballistic material reducing the performance of the product.
- **Do not use** disinfectant wipes that contain bleach.

Should you have any additional questions or concerns regarding the proper cleaning of PSP/Safariland armour products please contact [CustomerCare.PSP@safariland.com](mailto:CustomerCare.PSP@safariland.com).
